

Topics in Differential Problems and Functional Analysis

Rende, 29-30 September 2017

Department of Mathematics and Computer Science
University of Calabria

Aims and Scope

The aim of the two-days workshop is to introduce and to promote the sharing of problems, methods and new ideas in the widest sense. To this end, seven invited speakers will hold a talk among several topics including Ordinary and Partial Differential Equations, Variational Calculus, Differential Geometry, Functional Analysis and Fixed Point Theory. Discussion times and a poster session will help the interaction and sharing among researchers.

The workshop will be held at the University of Calabria - Department of Mathematics and Computer Science.

No conference fees are due.

Scientific Committee

Annamaria Canino, Vittorio Colao, Giuseppe Marino, Luigi Muglia, Berardino Sciunzi.

Organizing Committee

Vittorio Colao, Giuseppe Marino, Luigi Muglia

Invited Speakers

Gabriele Bonanno, Università di Messina

Alessandra Lunardi, Università di Parma

Carlo Mantegazza, Università di Napoli

Enrico Miglierina, Università Cattolica del Sacro Cuore, Milano

Berardino Sciunzi, Università della Calabria

Vincenzo Vespri, Università di Firenze

Fabio Zanolin, Università di Udine
