

PH.D. IN MATHEMATICS AND COMPUTER SCIENCE

COURSE SCHEDULE

ACADEMIC YEAR 2020/2021

OPTIMIZATION MODELS FOR MACHINE LEARNING

PROF. ANTONIO FUDULI
UNIVERSITY OF CALABRIA

22 - 26 March

During the course some optimization models applied to classification of data will be presented, with particular emphasis to the binary case. A distinction will be made among the supervised, unsupervised and semi-supervised cases and some concepts related to the Multiple Instance Learning will be introduced.
